

“Make your creative dreams real”

“Make your creative dreams real” is a guide, for you to live your creative dreams, and to make your creative dreams real. It is written by Sark, an author, an artist and a living proof of how creative dreams can come true once you express and learn what stops you from turning them real.

This book is basically divided into 12 chapters. Each chapter teaches you different things about your creative dreams. For example, how to create a dream, what stops you from making them real, how can you make them real, what do you need to make you dreams come real and how to keep your dream moving. Some chapters teach you how to manage your own dream and tell inspiring stories of other people and how they succeed with their dreams. Is also includes a lot of the author’s thoughts, suggestions and even her own dreams. The book explained about the main reason of why people can’t live their creative dreams. It is mainly because of fear that they’ll fail. Creative dreams are very important. They can contribute the world or even save someone’s life. This book does not only teach, it also communicates. The author could bring you to another world by simply saying that she’s sending you a luxury train ride that has all the inspiring people you have ever wanted to meet or talk to. She gave the readers courage to make their own dreams come true, because she believed that every single dream is important.

I think this book is a very creative and inspiring book. It’s not only for learning, but to also let you have fun and understand yourself more clearly. Although this book is mainly for adults, teens can still have fun reading it because the book is covered with drawings and some pages are even coloured with lots of different colours. I think Sark, the author, is a very special writer. Because she did not make herself sound perfect, she explained how hard she had to work to make her dreams come real. I think Sark’s a very strong person. Even though she was physically and sexually abused by a family member when she was young, Sark was still able to live her dream, her dream to become a writer and an artist. Now., she’s trying to help others, people that would want to live their dreams too. I learned to be creative. But also to work hard, give faith and believe in myself so that I will succeed in making my own dream come real too.
